SARAH RIVERA BALCAZAR

FRONTEND DEVELOPER

sarahannrivera25@gmail.com | 401-215-4156 | Rhode Island, USA | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Frontend developer building responsive, polished web experiences with React, JavaScript, HTML, and CSS, with hands-on Next.js and TypeScript experience. Brings a client-focused background in operations, project coordination, and design, with a strong eye for clean user experiences and thoughtful functionality.

TECHNICAL SKILLS

Frontend: JavaScript, React, Next.js, TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Design | **State & Data:** Redux Toolkit, REST APIs, Axios | **Tools & Services:** Git, GitHub, Vite, Vercel, Firebase, Firestore, EmailJS | **Other:** localStorage, Base64, API Integration

SELECTED PROJECTS

Skinstric | Next.js / TypeScript / Tailwind CSS / REST API 2026

- Built a responsive AI-powered skin analysis interface with image upload and webcam capture, Base64 image processing, API-driven analysis, and dynamic routing.
- Managed analysis data with client-side state and localStorage, creating interactive demographic results, animated loading states, and responsive data visualizations across mobile, tablet, and desktop.
- Refined functionality through mentor review, iterative debugging, responsive testing, Git-based development, and Vercel deployment.

Netflix Clone | React / Firebase / TMDB API 2026

- Built a responsive streaming interface with Firebase authentication, protected account flow, dynamic routing, and reusable React components.
- Added debounced TMDB movie search, clickable results, trailer routing/fallback behavior, environment-based credentials, and production deployment.

YouTube Clone | React / YouTube Data API 2026

- Integrated live YouTube Data API content for video feeds, categories, video details, channel data, engagement statistics, and comments.
- Implemented debounced search, dynamic video routing, responsive UI, external playback fallback, environment variables, and Vercel deployment.

FRONTEND DEVELOPER EXPERIENCE

Frontend Developer Intern | Frontend Simplified / Summarist 2026

- Built and refined production-style features in Next.js and TypeScript using Firebase/Firestore, Redux Toolkit, responsive UI patterns, and live API-driven data.
- Implemented authentication behavior, debounced search, responsive navigation and content pages, audio/player functionality, loading states, and reusable interface components.
- Worked through feature branches, pull-request review, mentor feedback, iterative debugging, and production deployment while completing intensive React/JavaScript frontend training.

PROFESSIONAL EXPERIENCE

Remote Field Agent | American Income Life / Prata Organization Feb 2025 – May 2026 | Trumbull, CT

- Managed the full remote sales cycle across multiple states, including outreach, scheduling, virtual presentations, needs analysis, follow-up, and application submission.
- Worked across quoting/application software, CRM/data systems, presentation tools, scripts, and video-conferencing platforms in a 100% remote environment.

Business Co-Owner | Rivera Renovation, Inc. / Rivera Properties LLC 2019 – Current | Rhode Island

- Coordinated financing, contracts, schedules, materials, vendors, and client-facing design decisions across renovation and real-estate projects.
- Translated client needs into practical design solutions while balancing budget, timeline, and project-delivery constraints.

EDUCATION & PROFESSIONAL DEVELOPMENT

Frontend Simplified - Frontend Development Program, 2026

Roger Williams University - Coursework | Johnson & Wales University - Coursework

ADDITIONAL EXPERIENCE

Extensive customer-service experience in high-volume, fast-paced environments, building strong communication, prioritization, problem-solving, and client-service skills.
